

# SUSTAINABILITY: THE GREAT IDEA FOR THE FUTURE!

## GreenWins®

### The value of a great idea

GreenWins® believes that a great idea has the power to change the world. This is why we develop projects in order to become true our major target: a sustainable future for everyone!

The technology developed by GreenWins® is capable to combine two important areas of your company: sustainable development and marketing through smart terminals that interact with people in order to motivate them to dispose waste as a proper way for rewards.

There is a lot to do in order to educate users about daily recycling results. Do you know which is the GreenWins® contribution in this process?

### Intelligent, fun and interactive recycling terminals

Our terminals are perfect for installing in public places with a high flow of people and draw attention by the modern and interactive design. The terminal is used for receiving waste of several types and sizes like batteries, expired medicine, etc. Our products can communicate and educate the people about the advantages and benefits of correct allocation of such waste.
